- Increased Pet Acceptance
- For Use With All Pets

Most Common Questions for MAXI/GUARD® Oral Cleansing Wipes

What is unique about MAXI/GUARD Oral Cleansing Wipes?

MAXI/GUARD Oral Wipes are both an effective pet oral care product and applicator all in one. Cleansing the oral cavity of pets is much faster and easier since the wipes are infused with our unique zinc formulation. This taste free compound neutralizes offensive mouth odors, helps reduce the deposition of plaque and aids in gingival inflammation. The wipes are textured to assist in the mechanical removal of plaque, but not so rough to cause damage to the gum tissue. MAXI/GUARD Oral Wipes increase owner compliance and pet acceptance.

What type of oral cases should I use MAXI/GUARD Oral Cleansing Wipes?

MAXI/GUARD Oral Wipes are ideal for controlling halitosis and reducing the deposition of plaque on pets that may not readily accept a toothbrush or for pet owners that have struggled with consistent application of an oral care product. It is perfect for maintaining oral health and for extending the time between professional dental cleanings.

What type of oral cases should a different product be considered?

MAXI/GUARD Oral Wipes are great for maintaining the mouth. If there are pre-existing conditions such as advanced periodontal cases, pets with stomatitis, after extractions and post-surgery, MAXI/GUARD Oral Cleansing Gel is recommended. This product contains our unique zinc ascorbate compound which assists in the resolution of these most difficult cases.

How do I use MAXI/GUARD Oral Cleansing Wipes?

Simply remove one oral wipe from the container and wrap around your index finger. Gently wipe the teeth and gums on both sides of the pet's mouth and dispose of the wipe properly. Be sure to create a positive experience by praising the pet after application. More than one wipe may be used for the first few applications or for larger pets. Use daily for best results.

How are MAXI/GUARD Oral Cleansing Wipes packaged and how should they be stored?

MAXI/GUARD Oral Cleansing Wipes are packaged with 100 wipes per jar and 10 wipes per pouch. It is recommended to store the jar upside down for a perfectly moist wipe for each application. Ensure pouches are completely sealed to prevent drying. Storage under normal room temperature is preferred.

Are there any in-clinic uses for MAXI/GUARD Oral Cleansing Wipes?

Yes. MAXI/GUARD Oral Wipes can be used as a great educational aid to show pet owners the importance of good home oral care. Simply use one wipe to clean the mouth of a client's pet and show the client the wipe after application. The client will be amazed at the amount of oral debris that was present in their pet's mouth. This makes it much easier to promote pet dental care and daily use of MAXI/GUARD Oral Wipes.
